

Adoption

To share life, love and joy!

At Harmony Adoptions, our passion lies in knowing that one less child is waiting to find a forever family. Our mission and our services focus on the needs of these children who need to be connected to loving homes and in serving the families who have chosen to begin the lifelong journey of adoption.

Founded as a licensed child-placing agency in 1996, Harmony provides adoption services not only for families pursuing both domestic and international adoptions, but also for birth parents considering adoption. These families are able to receive guidance, support, and the answers to their questions every step of the way from our dedicated and experienced staff.

Domestic Adoption- At Harmony Adoptions, clients are not simply case numbers; they are families deserving of individual treatment that is respectful of their personal hopes and dreams. Our responsibility is to provide these families with the information needed to successfully complete a domestic adoption and to prepare them for the process of this journey. While Harmony is an adoption agency based near Knoxville, Tennessee, our network of attorneys, adoption agencies, and hospitals opens doors to possibilities for adoption not only in Tennessee, but also across the country.

International Adoption- Harmony has a long history of helping families adopt children internationally. We

work closely with international placing agencies connecting orphaned children throughout the world with their forever families here in East Tennessee. Our agency assists families adopting infants, older children, and those with special needs.

Birth Parent Services- Any pregnancy, planned or unplanned, will produce many emotions, concerns, and questions. While each pregnancy story is unique, many of the questions are common and shared by many. Harmony Adoptions provides birth parents with knowledge related to the adoption process and provides resources to help guide decision making.

Home Studies- Every adoption is unique. Families come to Harmony in different situations. The home study process may feel complicated and overwhelming for some. This procedure is a thorough evaluation of a person's capacity to parent an adopted child. A home study includes gathering documents (such as medical statements, birth and marriage certificates, criminal background checks, letters from employers, personal references, etc.), interviews, and a home inspection. At Harmony, we seek to partner with our families to make home studies smooth and comfortable. Our professional staff guides clients through the process, meeting families wherever they are, and making sure their needs are met.
